CAREER OBJECTIVE ||

I am a Full stack Developer with experience of working on a variety of web development projects as well as mobile applications. I work on all aspects of the development life cycle. My past work includes building user-focused, dynamic, innovative and functional websites using responsive / adaptive / mobile-first design and development. I like to use my knowledge of tech to solve real life problems and find solutions, build products and help people.

KEY PROJECTS ||

I developed a delivery/logistics application using flutter for the front end and I connected it with a PHP backend and communicated with an SQL database to store data. It is fully functional on Android and IOS. It is user friendly with a modern UI design and good choice of colors.

The currently defunct London based *Joshua Joshua luxury brand*. I was the head of the tech department as I fully built the brand's E-Commerce website from scratch to finish. I implemented Paystack payment solution to accept payments from anywhere around the world.

KEY PROJECTS ||

- ReactJS
- MongoDB
- NodeJS/ExpressJS
- Typescript
- JavaScript
- PHP, MySQL
- Version Control - Git
- Bootstrap / jQuery
- Mysqli
- Agile and Scrum
- Experience of building and integrating with API (REST)

- Ability to develop and maintain front and back-end code to a high standard and to agreed timescales
- Ability to prioritize, organize, plan and coordinate work and other activities
- Ability to provide clear regular progress updates to managers and stakeholders
- Good interpersonal and communication skills with a high level of professionalism
- Able to act as first-line technical support for issues and bugs
- Ability to work with a team and have a good chemistry while at it.

EDUCATION ||

DIPLOMA IN ECONOMICS   **UNIVERSITY OF LAGOS 2018-2019**

I did a diploma course in Economics in the University of Lagos. My reason for this is because I am very passionate about the Financial Technology (FinTech) industry. So I had to advance my knowledge in the financial aspect in other to have a blend of my tech expertise and finance.

HEAD OF TECH TEAM   **JOSHUA JOSHUA LUXURY BRAND, LONDON : APR 2018 – SEP 2019**

Redefining luxury and also making everyone know what luxury is really about, I was the head of the IT department. I fully developed the E-Commerce website and later got a team to manage it. I built the backend of the website using React and MongoDB for the database. I created the back end with NodeJs and ExpressJs. I created an admin panel to manage products, users and other analytics of the website. I was constantly coming up with tech advice on how we could improve the quality of the brand. My core roles included:

- Diagnosing and fixing bugs
- Scoping out and developing new features in line with a specification and to a deadline
- Managing the database
- Making improvements to Interfaces and adding new features

The company is currently defunct.

TEAM LEAD   **CHEKAM.COM : MAY 2022 - PRESENT**

Chekam is a property listing website, the goal is to bring ease to users when it comes to renting of apartments or buying of properties. I built several components with React, Bootstrap, React hooks and worked on numerous functionalities and filters on the buy, shortlet and rent page respectively. I worked with a team to achieve this goal within the specified time. I also worked with an API to fetch the properties from the database to several components.

FREELANCE

I have worked on several frontend projects. I work hand in hand with a team of developers to carry out these projects. I often use JavaScript frameworks like ReactJs; it depends on what we are asked to work with or the project at hand. Our aim is our client's satisfaction.
